Water Rights Bureau

ENVIRONMENTAL ASSESSMENT
For Routine Actions with Limited Environmental Impact

Part I. Proposed Action Description

1. Applicant/Contact name and address:

Wayne R. Sand and Mary Jane Westermarck Revocable Trust
236 Slippery Bill Rd.
Essex, MT 59916

2. Type of action: Permit Registration for Groundwater Use Within the National Park Service Compact Area No. 76I 30149706

3. Water source name: Groundwater

4. Location affected by project: N2NENW, Section 21, Township 29N, Range 14W, Flathead County, Montana. The point of diversion and place of use are within Lot 32 of the Slippery Bill Mountain Unit 2 subdivision.

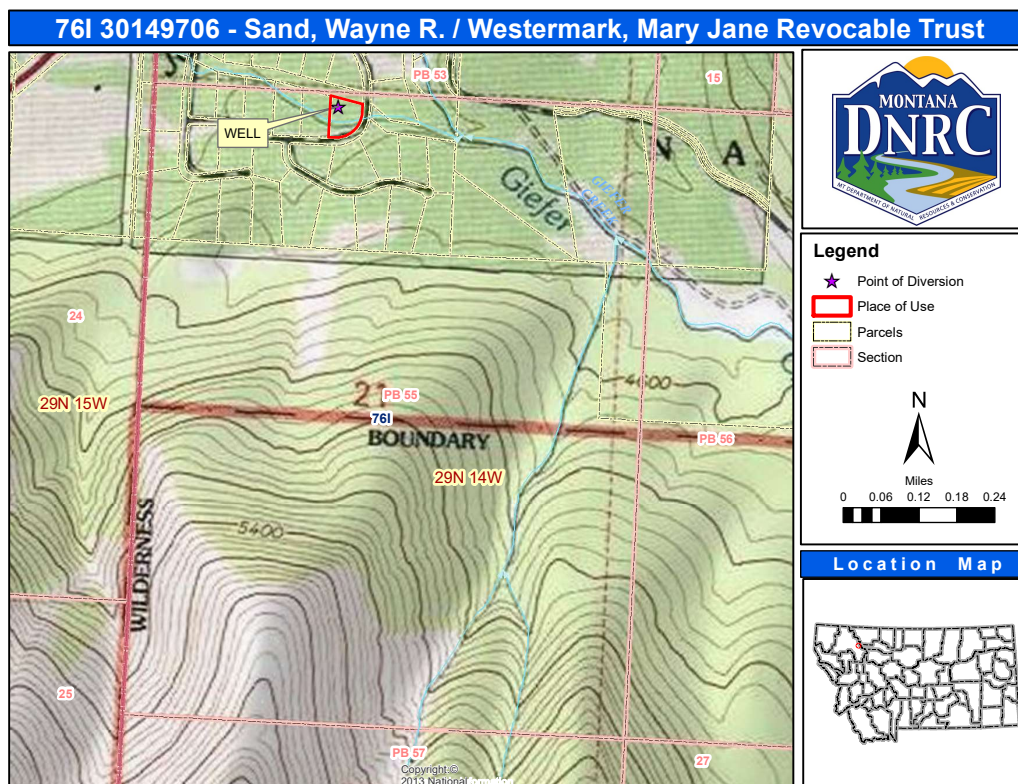

Figure 1. Map of the proposed place of use and point of diversion.

5. Narrative summary of the proposed project, purpose, action to be taken, and benefits:

This application is to obtain a water use permit for a well located within the Glacier National Park Compact Area in the above-described location. The Applicant proposes to divert water at a rate of 26 gallons per minute (GPM) up to 1.75 acre-feet (AF) per year. The proposed appropriation is for domestic use from January 1st – December 31st and irrigation of 0.3 acres of lawn and garden from April 1st – October 31st. The point of diversion and place of use are in the N2NENW, Section 21, Township 29N, Range 14W, Flathead County, Montana. The point of diversion/place of use are in the Middle Fork Flathead River Basin (76I).

The DNRC shall issue a water use permit if the Applicant proves the criteria in 85-20-401 MCA are met.

6. Agencies consulted during preparation of the Environmental Assessment:

- U.S. Fish and Wildlife Service (USFWS): National Wetlands Inventory Wetlands Mapper
- Montana Natural Heritage Program: Endangered, Threatened Species, and Species of Special Concern
- Montana Department of Fish Wildlife & Parks (DFWP): Dewatered Stream Information
- Montana Department of Environmental Quality (MDEQ): Clean Water Act Information Center
- U.S. Natural Resource Conservation Service (NRCS): Web Soil Survey
- U.S. National Park Service (NPS) Water Rights Branch

Part II. Environmental Review

1. Environmental Impact Checklist:

<p>PHYSICAL ENVIRONMENT</p>

WATER QUANTITY, QUALITY AND DISTRIBUTION

Water quantity - Assess whether the source of supply is identified as a chronically or periodically dewatered stream by DFWP. Assess whether the proposed use will worsen the already dewatered condition.

The Applicant proposes to divert groundwater from a well that is approximately 900 feet west of Giefer Creek, tributary to Bear Creek, which is tributary to the Middle Fork of the Flathead River. The Middle Fork of the Flathead River is not identified by the DFWP as a chronically or periodically dewatered stream.

Determination: No significant impact.

Water quality - Assess whether the stream is listed as water quality impaired or threatened by DEQ, and whether the proposed project will affect water quality.

The Applicant proposes to divert and use groundwater. The reach of the Middle Fork of the Flathead River which may be depleted by groundwater pumping is listed as fully supporting for all beneficial uses for which it has been assessed. It is not anticipated that pumping of the Applicant's groundwater well will have any negative impacts on the water quality of the Middle Fork of the Flathead River.

Determination: No significant impact.

Groundwater - Assess if the proposed project impacts ground water quality or supply. If this is a groundwater appropriation, assess if it could impact adjacent surface water flows.

The Applicant will divert groundwater from the aquifer at a rate of 26 GPM. The well is 135 feet deep and approximately 900 feet west of Giefer Creek, tributary to Bear Creek, which is tributary to the Middle Fork of the Flathead River. The NPS did not object to this application, therefore the flow rate will not be included in the calculation of total consumptive use for the Middle Fork of the Flathead River per the Glacier National Park Compact.

Determination: No significant impact.

DIVERSION WORKS - Assess whether the means of diversion, construction and operation of the appropriation works of the proposed project will impact any of the following: channel impacts, flow modifications, barriers, riparian areas, dams, well construction.

The means of diversion (well) has already been constructed and the water put to beneficial use. Since this is a groundwater appropriation, there will be no channel impacts, flow modifications, barriers, dams, or riparian impacts to the Middle Fork of the Flathead River.

Determination: No significant impact.

UNIQUE, ENDANGERED, FRAGILE OR LIMITED ENVIRONMENTAL RESOURCES

Endangered and threatened species - Assess whether the proposed project will impact any threatened or endangered fish, wildlife, plants or aquatic species or any "species of special concern," or create a barrier to the migration or movement of fish or wildlife. For groundwater, assess whether the proposed project, including impacts on adjacent surface flows, would impact any threatened or endangered species or "species of special concern."

The Montana Natural Heritage Program website was reviewed to determine if there are any threatened or endangered fish, wildlife, plants, aquatic species, or any "species of special concern" in Township 29N, Range 14W that could be impacted by the proposed project. 11 animal and three plant species of concern (Tables 1 and 2, respectively) were identified within the township and range where the project is located. Of these species, the Canada Lynx (*Lynx canadensis*), the Grizzly Bear (*Ursus arctos*), and the Bull Trout (*Salvelinus confluentus*) are listed as threatened by the USFWS. An adequate quantity of water will still exist in the adjacent surface water sources to maintain existing populations of Bull Trout, should they exist there.

currently. The well and dwelling have already been constructed; any impacts to sensitive species have most likely already occurred and further significant impacts are not anticipated.

Table 1. Animal Species of Concern			
Wolverine (<i>Gulo gulo</i>)	Canada Lynx (<i>Lynx canadensis</i>)	Fisher (<i>Pekania pennanti</i>)	Grizzly Bear (<i>Ursus arctos</i>)
Brown Creeper (<i>Certhia americana</i>)	Cassin's Finch (<i>Haemorhous cassinii</i>)	Varied Thrush (<i>Ixoreus naevius</i>)	Pacific Wren (<i>Troglodytes pacificus</i>)
Westslope Cutthroat Trout (<i>Oncorhynchus clarkii lewisi</i>)	Bull Trout (<i>Salvelinus confluentus</i>)	Gillette's Checkerspot (<i>Euphydryas gillettii</i>)	

Table 2. Plant Species of Concern		
Whitebark Pine (<i>Pinus albicaulis</i>)	Bractless Hedge-hyssop (<i>Gratiola ebracteata</i>)	Stalk-leaved Monkeyflower (<i>Mimulus ampliatus</i> / <i>Mimulus patulus</i> / <i>Mimulus washingtonensis</i>)

Determination: No significant impact.

Wetlands - Consult and assess whether the apparent wetland is a functional wetland (according to COE definitions), and whether the wetland resource would be impacted.

Determination: N/A, project does not involve wetlands or critical riparian habitats.

Ponds - For ponds, consult and assess whether existing wildlife, waterfowl, or fisheries resources would be impacted.

Determination: N/A, project does not involve ponds.

GEOLOGY/SOIL QUALITY, STABILITY AND MOISTURE - Assess whether there will be degradation of soil quality, alteration of soil stability, or moisture content. Assess whether the soils are heavy in salts that could cause saline seep.

It is not anticipated that the proposed domestic and lawn and garden water uses will have a negative impact on the soil quality, stability, or moisture content. The soils in the project area are Fluvents, stream bottoms, formed from alluvium parent material. Fluvents, stream bottoms, have high to very high capacity to transmit water. Soils within the place of use are not likely susceptible to saline seep.

Determination: No significant impact.

VEGETATION COVER, QUANTITY AND QUALITY/NOXIOUS WEEDS - *Assess impacts to existing vegetative cover. Assess whether the proposed project would result in the establishment or spread of noxious weeds.*

Building construction and property development, and thus any impact to existing vegetation, has already occurred on the property. It is not anticipated that issuance of a water use permit will contribute to the establishment or spread of noxious weeds in the project area. Noxious weed prevention and control will be the responsibility of the landowner, who must follow all applicable noxious weed regulations.

Determination: No significant impact.

AIR QUALITY - *Assess whether there will be a deterioration of air quality or adverse effects on vegetation due to increased air pollutants.*

There will be no impact to air quality associated with issuance of the proposed permit for beneficial use of groundwater.

Determination: No significant impact.

HISTORICAL AND ARCHEOLOGICAL SITES - *Assess whether there will be degradation of unique archeological or historical sites in the vicinity of the proposed project if it is on State or Federal Lands. If it is not on State or Federal Lands simply state NA-project not located on State or Federal Lands.*

Determination: N/A, project not located on State or Federal Lands.

DEMANDS ON ENVIRONMENTAL RESOURCES OF LAND, WATER, AND ENERGY - *Assess any other impacts on environmental resources of land, water, and energy not already addressed.*

All impacts to land, water, and energy have been identified and no further impacts are anticipated.

Determination: No significant impact.

<h2>HUMAN ENVIRONMENT</h2>

LOCALLY ADOPTED ENVIRONMENTAL PLANS AND GOALS - *Assess whether the proposed project is inconsistent with any locally adopted environmental plans and goals.*

The project is consistent with planned land uses.

Determination: No significant impact.

ACCESS TO AND QUALITY OF RECREATIONAL AND WILDERNESS ACTIVITIES - *Assess whether the proposed project will impact access to or the quality of recreational and wilderness activities.*

The well is drilled on private property. The proposed project will not inhibit, alter, or impair access to present recreational opportunities in the area. The project is not expected to create any significant pollution, noise, or traffic congestion in the area that may alter the quality of recreational opportunities. The proposed place of use and diversion do not exist on land designated as wilderness.

Determination: No significant impact.

HUMAN HEALTH - *Assess whether the proposed project impacts human health.*

No significant negative impact on human health from this proposed use is anticipated.

Determination: No significant impact.

PRIVATE PROPERTY - *Assess whether there are any government regulatory impacts on private property rights.*

Yes___ No X If yes, analyze any alternatives considered that could reduce, minimize, or eliminate the regulation of private property rights.

Determination: No impact.

OTHER HUMAN ENVIRONMENTAL ISSUES - *For routine actions of limited environmental impact, the following may be addressed in a checklist fashion.*

Impacts on:

- (a) Cultural uniqueness and diversity? None identified.
- (b) Local and state tax base and tax revenues? None identified.
- (c) Existing land uses? None identified.
- (d) Quantity and distribution of employment? None identified.
- (e) Distribution and density of population and housing? None identified.
- (f) Demands for government services? None identified.
- (g) Industrial and commercial activity? None identified.
- (h) Utilities? None identified.
- (i) Transportation? None identified.
- (j) Safety? None identified.
- (k) Other appropriate social and economic circumstances? None identified.

2. ***Secondary and cumulative impacts on the physical environment and human population:***

Secondary Impacts: None identified.

Cumulative Impacts: None identified.

3. ***Describe any mitigation/stipulation measures:***

None.

4. ***Description and analysis of reasonable alternatives to the proposed action, including the no action alternative, if an alternative is reasonably available and prudent to consider:***

The only alternative to the proposed action would be the no action alternative. The no action alternative would not authorize the diversion of groundwater at this location. The well has already been drilled and the water put to beneficial use at this location.

Part III. Conclusion

1. ***Preferred Alternative***

Issue a water use permit if the Applicant proves the criteria in 85-20-401 MCA are met.

2. ***Comments and Responses***

None.

3. ***Finding:***

Yes ___ No X Based on the significance criteria evaluated in this EA, is an EIS required?

If an EIS is not required, explain why the EA is the appropriate level of analysis for this proposed action:

No significant impacts related to the proposed project have been identified.

Name of person(s) responsible for preparation of EA:

Name: Travis Wilson
